# BRIEF IN A NUTSHELL

# SOLUTION REQUIREMENTS

- The purpose of this RFP is to appoint a partner/vendor to supply, deliver, install a Warehouse Management System (WMS) that can automate critical workflows to increase cross functional collaboration within the supply and distribution.

# SOLUTION REQUIREMENTS

## Warehouse Management Systems: Functionality

- **Receiving:** Check in and log in coming equipment. Verify receiving correct quantity at the right condition at the correct time. Scan quantity on what was delivered directly to ERP system.
- **Task Management:** Ensure it automatically creates warehouse tasks, such as picking and replenishment tasks, and queues them for assignment to specific workers.
- **Quality Analysis:** Ensure WMS automatically generates work as part of the receiving process, to move the inventory quantity that is required for quality control to a quality control location.

# SOLUTION REQUIREMENTS

## Warehouse Management Systems: Functionality

- **Warehouse Optimization:** Easy and efficient tracking of inventory and order related information such as lot Page 22 of 32 details, expiry dates.
- **Cloud Based Inventory Management:** WMS to be cloud based to: Optimizes costs to speed up implementation time and increases flexibility and scalability to adapt to business variations and growth.
- **Artificial Intelligence:** Enable networking of devices, monitoring operations determining the right metrics to se to guide productivity at the warehouse.

# SOLUTION REQUIREMENTS

- **Training**

Training should be included and be offered prior to project implementation. Training is expected to go up to advanced level for the purpose of Operation & Maintenance, high level configurations, troubleshooting, optimization, and general support.

- **Service Levels**

- MTC expects that the successful Vendor to adhere to the minimum Service Levels listed in the RFP.
